

**In the Specification**

Please replace the paragraph beginning at page 16, line 11 in the application as originally filed with the following rewritten paragraph:

In Fig. 4, the adhesive wafer 22 extends from an inner rim 21 that forms of the central hole to an outer rim 24. The inner rim 21 has been rolled up forming a torus 29, and revealing a larger part of the surface of the release liner 25 below, which provides an ~~and of the~~ indication of the size of the hole as illustrated in Fig. 5.
